The Erasmus team attended to a lecture on

<u>Sustainable Development Goals</u>

given by Professor Narciso Antunes from the European University and participated in a workshop where they learnt how to prepare activities for younger students

CLIMATE CHANGE AND CARBON FOOTPRINT OPTIMIZATION

The Erasmus team and Eco School Club prepared a **workshop** for younger students in our school *about Energy and Water Saving* using the video they made about “Energy saving”*, the Tik Tok song about “Water saving”*and activities specially designed for 4th grade students. (*This material was shared with the primary teachers in the school so that they can use it every time they approach these topics in their classes)

A Game: “How many…”

Erasmus students also taught the younger students how to create a game to play and find more about water and energy saving.(*This material was shared with the primary teachers in the school so that they can use it every time they approach these topics in their classes)
